

Below are some scientific papers published as a result of Animal Free Research UK funded projects:

Bramwell, L.R., Frankum, R., Harries, L. (2024). Repurposing Drugs for Senotherapeutic Effect: Potential Senomorphic Effects of Female Synthetic Hormones. Preprints. 2024012003.

<https://doi.org/10.20944/preprints202401.2003.v1>

Robinson, E., Herbert, J. A., Palor, M., Ren, L., Larken, I., Patel, A., Moulding, D., Cortina-Borja, M., Smyth, R. L., & Smith, C. M. (2023). Trans-epithelial migration is essential for neutrophil activation during RSV infection. *Journal of Leukocyte Biology*, 113(4), 354–364.

<https://doi.org/10.1093/JLEUKO/QIAD011>

Hockney, S., Parker, J., Turner, J. E., Todd, X., Todryk, S., Gieling, R. G., Hilgen, G., Simoes, D. C. M., & Pal, D. (2023). Next generation organoid engineering to replace animals in cancer drug testing. *Biochemical Pharmacology*, 213, 115586. <https://doi.org/10.1016/J.BCP.2023.115586>

Bramwell, L. R., & Harries, L. W. (2023). Senescence, regulators of alternative splicing and effects of trametinib treatment in progeroid syndromes. *GeroScience*.

<https://doi.org/10.1007/S11357-023-00933-Z>

Davies, M., Bramwell, L. R., Jeffery, N., Bunce, B., Lee, B. P., Knight, B., Auckland, C., Masoli, J. A., & Harries, L. W. (2022). Persistence of clinically relevant levels of SARS-CoV2 envelope gene subgenomic RNAs in non-immunocompromised individuals. *International Journal of Infectious Diseases*, 116, 418. <https://doi.org/10.1016/J.IJID.2021.12.312>

Raniga, K., Vo, N. T. N., & Denning, C. (2022). Differentiation and Characterization of Human Pluripotent Stem Cell-Derived Cardiac Endothelial Cells for In Vitro Applications. *Methods in Molecular Biology*, 2441, 339–348. https://doi.org/10.1007/978-1-0716-2059-5_27

Pilkington, K., & Pilkington, G. J. (2022). *Boswellia*: Systematically scoping the in vitro, in vivo and clinical research. *European Journal of Integrative Medicine*, 56, 102197.

<https://doi.org/10.1016/J.EUJIM.2022.102197>

Martin, E. R., Gandawijaya, J., & Oguro-Ando, A. (2022). A novel method for generating glutamatergic SH-SY5Y neuron-like cells utilizing B-27 supplement. *Frontiers in Pharmacology*, 13, 943627. <https://doi.org/10.3389/FPHAR.2022.943627>

Dupan, S., McNeill, Z., Sarda, E., Brunton, E., & Nazarpour, K. (2022). How Fast Is Too Fast? Boundaries to the Perception of Electrical Stimulation of Peripheral Nerves. *IEEE Transactions on Neural Systems and Rehabilitation Engineering*, 30, 782–788.

<https://doi.org/10.1109/TNSRE.2022.3158067>

Woodall, M. N. J., Masonou, T., Case, K. M., & Smith, C. M. (2021). Human models for COVID-19 research. *The Journal of Physiology*, 599(18), 4255–4267. <https://doi.org/10.1113/JP281499>

Singh, B., Abdelgawad, M. E., Ali, Z., Bailey, J., Budyn, E., Civita, P., Clift, M. J. D., Connelly, J. T., Constant, S., Hittinger, M., Kandarova, H., Kearns, V. R., Kiuru, T., Kostrzewski, T., Kress, S., Durban, V. M., Lehr, C. M., McMillan, H., Metz, J. K., Wilkinson, J. M. (2021). Towards more predictive, physiological and animal-free in vitro models: Advances in cell and tissue culture 2020 conference proceedings. *ATLA Alternatives to Laboratory Animals*, 49(3), 93–110.

<https://doi.org/10.1177/02611929211025006>

Rahman, M. M., Herath, D., Bladen, J. C., Atkar, R., Pirzado, M. S., Harwood, C., Philpott, M. P., & Neill, G. W. (2021). Differential expression of phosphorylated MEK and ERK correlates with aggressive BCC subtypes. *Carcinogenesis*, 42(7), 975–983.

<https://doi.org/10.1093/CARCIN/BGAB036>

McMillan, H., Lundy, F. T., Dunne, O. M., Al-Natour, B., Jeanneau, C., About, I., Curtis, T. M., & el Karim, I. (2021). Endogenous Mas-related G-protein-coupled receptor X1 activates and sensitizes TRPA1 in a human model of peripheral nerves. *The FASEB Journal*, 35(5), e21492.

<https://doi.org/10.1096/FJ.202001667RR>

Jeffery, N., Chambers, D., Invergo, B. M., Ames, R. M., & Harries, L. W. (2021). Changes to the identity of EndoC- β H1 beta cells may be mediated by stress-induced depletion of HNRNP. *Cell and Bioscience*, 11(1), 1–18. <https://doi.org/10.1186/S13578-021-00658-6>

Daniel, A. J., Buchanan, C. E., Allcock, T., Scerri, D., Cox, E. F., Prestwich, B. L., & Francis, S. T. (2021). Automated renal segmentation in healthy and chronic kidney disease subjects using a convolutional neural network. *Magnetic Resonance in Medicine*, 86(2), 1125–1136.

<https://doi.org/10.1002/MRM.28768>

Bramwell, L. R., & Harries, L. W. (2021). Targeting Alternative Splicing for Reversal of Cellular Senescence in the Context of Aesthetic Aging. *Plastic and Reconstructive Surgery*, 147(1S-2), 25S–32S. <https://doi.org/10.1097/PRS.00000000000007618>

Buchanan, C. E., Mahmoud, H., Cox, E. F., McCulloch, T., Prestwich, B. L., Taal, M. W., Selby, N. M., & Francis, S. T. (2020). Quantitative assessment of renal structural and functional changes in chronic kidney disease using multi-parametric magnetic resonance imaging. *Nephrology Dialysis Transplantation*, 35(6), 955–964. <https://doi.org/10.1093/NDT/GFZ129>

Bracher, M., Pilkington, G. J., Hanemann, C. O., & Pilkington, K. (2020). A Systematic Approach to Review of in vitro Methods in Brain Tumour Research (SAToRI-BTR): Development of a Preliminary Checklist for Evaluating Quality and Human Relevance. *Frontiers in Bioengineering and Biotechnology*, 8, 546159. <https://doi.org/10.3389/FBIOE.2020.00936>

Jeffery, N., Richardson, S., Chambers, D., Morgan, N. G., & Harries, L. W. (2019). Cellular stressors may alter islet hormone cell proportions by moderation of alternative splicing patterns. *Human Molecular Genetics*, 28(16), 2763–2774.

<https://doi.org/10.1093/HMG/DDZ094>

Jassam, S. A., Maheraly, Z., Ashkan, K., Pilkington, G. J., & Fillmore, H. L. (2019). Fucosyltransferase 4 and 7 mediates adhesion of non-small cell lung cancer cells to brain-derived endothelial cells and results in modification of the blood–brain-barrier: in vitro investigation of CD15 and CD15s in lung-to-brain metastasis. *Journal of Neuro-Oncology*, 143(3), 405–415. <https://doi.org/10.1007/S11060-019-03188-X>

Boyle, C. J., Plotczyk, M., Villalta, S. F., Patel, S., Hettiaratchy, S., Masouros, S. D., Masen, M. A., & Higgins, C. A. (2019). Morphology and composition play distinct and complementary roles in the tolerance of plantar skin to mechanical load. *Science Advances*, 5(10).

<https://doi.org/10.1126/SCIADV.AAY0244>

Aasen, S. N., Espedal, H., Holte, C. F., Keunen, O., Karlsen, T. V., Tenstad, O., Maheraly, Z., Miletic, H., Hoang, T., Eikeland, A. V., Baghirova, H., Olberg, D. E., Pilkington, G. J., Sarkar, G., Jenkins, R. B., Sundstrøm, T., Bjerkvig, R., & Thorsen, F. (2019). Improved drug delivery to brain

metastases by peptide-mediated permeabilization of the blood–brain barrier. *Molecular Cancer Therapeutics*, 18(11), 2171–2181. <https://doi.org/10.1158/1535-7163.MCT-19-0160>

Toofan, P., Busch, C., Morrison, H., O'Brien, S., Jørgensen, H., Copland, M., & Wheadon, H. (2018). Chronic myeloid leukaemia cells require the bone morphogenic protein pathway for cell cycle progression and self-renewal. *Cell Death & Disease* 2018 9:9, 9(9), 1–19. <https://doi.org/10.1038/s41419-018-0905-2>

Faniku, C., O'Shaughnessy, E., Lorraine, C., Johnstone, S. R., Graham, A., Greenhough, S., & Martin, P. E. M. (2018). The Connexin Mimetic Peptide Gap27 and Cx43-Knockdown Reveal Differential Roles for Connexin43 in Wound Closure Events in Skin Model Systems. *International Journal of Molecular Sciences* 2018, Vol. 19, Page 604, 19(2), 604. <https://doi.org/10.3390/IJMS19020604>

Buchanan, C. E., Cox, E. F., & Francis, S. T. (2018). Evaluation of 2D Imaging Schemes for Pulsed Arterial Spin Labeling of the Human Kidney Cortex. *Diagnostics* 2018, Vol. 8, Page 43, 8(3), 43. <https://doi.org/10.3390/DIAGNOSTICS8030043>

Jeffery, N., Richardson, S., Beall, C., & Harries, L. W. (2017). The species origin of the cellular microenvironment influences markers of beta cell fate and function in EndoC- β H1 cells. *Experimental Cell Research*, 361(2), 284–291. <https://doi.org/10.1016/J.YEXCR.2017.10.028>

Cowie, C. J. A., & Cunningham, M. O. (2014). Peritumoral epilepsy: Relating form and function for surgical success. *Epilepsy & Behaviour*, 38, 53–61. <https://doi.org/10.1016/J.YEBEH.2014.05.009>
